Art Unit: 3611

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: A “journaling for said wheel frame with slide steering”, as recited in claims 9 and 24, must be described in applicant’s detailed description and shown in the drawing figures for that structure to be claimed.

2. Claims 1- 16, 18, 20, 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 13, “link that allow” should be –link that allows-.

Claim 2 does not appear to further limit the subject matter of the independent claim and, therefore, should be canceled.

In claim 4, line 3, “in particular” is indefinite and should be deleted.

In claim 6, lines 3, after “trailer: -frame- should be inserted.

In claim 7, line 4, “an actuator are” should be –an actuator is-.

In claim 9, line 3, “comprise” should be –comprises-. Also, it is not clear what applicant means by “journaling for said wheel frame with slide steering”. That structure is not described in applicant’s detailed disclosure and its meaning is not apparent from the drawings or claim language.

In claim 15, line 10, “rear end frame” should be –rear end of the frame-.

Claim 18 does not further limit the claim and should be deleted.

In claim 20, “in particular” is indefinite and should be deleted.

Art Unit: 3611

In claim 23, applicant indicates "said actuator is coupled to the wheel frame" to produce turning of wheels about a vertical axis in relation to the wheel frame. However, this is inconsistent with applicant's disclosed invention which includes an actuator (or pair of actuators) to turn the wheel frame relative to the trailer frame and a different actuator for turning the wheels relative to the wheel frame.

In claim 24, it is not clear what applicant means by "journaling for said wheel frame with slide steering". That structure is not described in applicant's detailed disclosure and its meaning is not apparent from the drawings or claim language.

3. Claims 1-16, 18, 20, 23, and 24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

4. Claims 17, 19, 21, 22, 25, and 26 are allowed.

5. Applicant's arguments with respect to claims 1-16, 18, 20, 23, and 24 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3611

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
